

# RamOS

## Unified Imaging Platform

Seamless imaging workflows. Store, manage, and access data (images, videos, reports) securely. Intuitive interface for visualization and collaboration.

## AI Orchestrator

Automate AI model integration. Real-time monitoring, preprocessing, and explainable results. Seamless healthcare system integration.

## Workflow Optimization

AI-driven worklists prioritize studies by urgency and expertise. Centralized dashboards and interoperability with HIS/RIS boost efficiency.

## AI Dockyard

Build and deploy custom AI models using in-house data. Tools for training, validation, and fine-tuning. MLOps for continuous improvement.

## Intelligent Worklist

AI-powered case management. Assign studies by urgency, expertise, and workload. Real-time updates and seamless HIS/RIS integration.

## Universal Smart Viewer

Access imaging studies on any device. Supports DICOM/non-DICOM formats. Advanced visualization (MPR, MIP, 3D) and real-time collaboration.

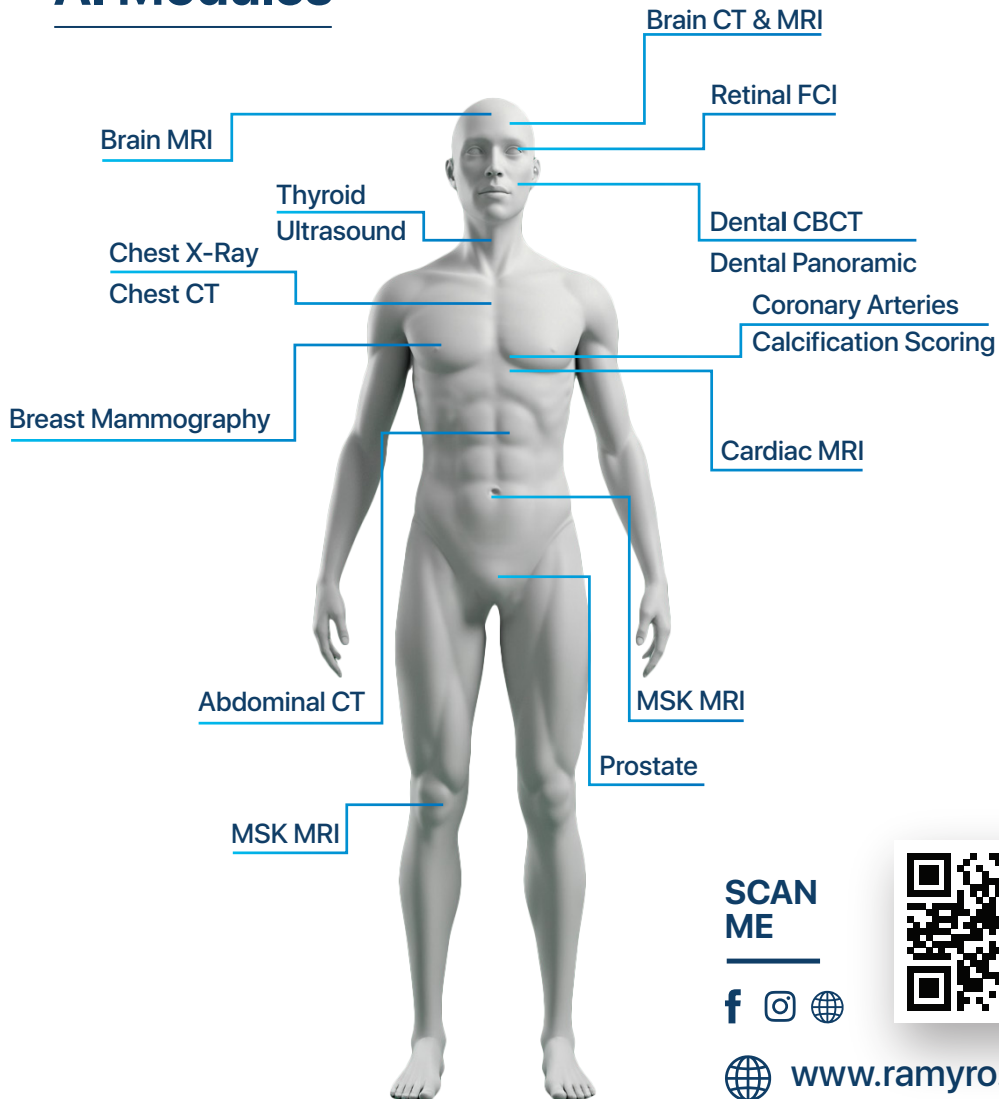

## Intelligent Reporting Tool

Streamline reporting with templates, voice dictation, and AI assistance. Real-time collaboration and compliance with industry standards.

# Transforming Diagnostics With Cutting-Edge AI Solutions

Revolutionize healthcare with Ramyro's advanced AI algorithms and modules. From breast mammography to brain MRI, our solutions deliver unmatched accuracy, efficiency, and scalability. Empower your clinical workflows with AI-driven insights, seamless integration, and patient-focused care. Discover the future of medical imaging today
